KAIZEN IMPACTS OUR WORK FLOW

KAIZEN

The incorporation of KAIZEN has tremendously impacted the work structure across all levels of our operation.

The process has helped us to improve the work flow between different divisions to optimize core competency within the organization.

Major benefits that we have experienced through KAIZEN program as of now are as under;

- **Aim:** Co-alignment of Steel Scaffolding unit into modulation of flow in a 'Lean Factory' conceptual configuration
- **Selection Bias:** Identification of 9 individual, 'Factory-within-Factory', units, which are: K-Stage, K-Lock, K-Ring, Fabrication, Frames, Machine Shop, RMD, Mesh/TSS, Props.

- **Establishing the Grounds:** Establishing the preconditioning data and clearing the grounds for post conditioning by identifying the modular scopes.

- **Unitary Consignment of Plan Development:** Fixing the layouts of individual sections abiding with the concepts of 'Lean Manufacturing'. The following have been set on paper: K-Stage, Mesh/TSS, Frames, K Lock & Props; with consideration of further improvements and further conditioning.

- **Translation:** Conversion of on-paper activities to groundwork by co-aligning the Mesh/TSS section with the 'Lean Factory' Module and giving a fresh start to the section with an improved production rate and a scope of further development and improvement.

A Heartfelt Tribute

☹️ Another year has passed of us being without you. There is not a single day when we haven't missed your presence and your warmth around us.

Be it a new venture, a fresh acquisition or a new milestone we achieve, it is like unleashing a new page from your life history. Every day we are reminded of your achievements and the unsaleable legacy that you have left behind for generations to come. 💧

We, at KHK, paid our heartiest tribute to our **Founder and Chairman – Late Arjan Taurani** on his second death anniversary by distributing sweets within and outside KHK premises to refresh the sweet memories of a warm person.

- **Integration with the 'Brand New' Concept:** Constructing a new arena for the K-Stage Module, an exemplar, and establishing the grounds for a similar integration of other sections to be developed.

- **Pre-Mature Establishments:** Constant trials of various innovative concepts to structure a better output of Modular growth.

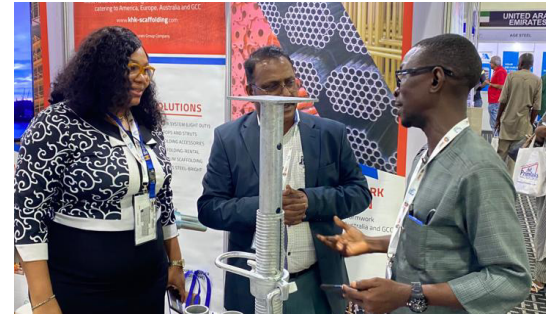

ON A SHARED PATH OF EQUAITY

#KHK NIGERIA

Nigeria's burgeoning construction and infrastructure landscape, featuring projects such as the Abuja Millennium Tower, Lekki Free Trade Zone, Eko Atlantic, and Badagry Deep-Sea Port, is currently witnessing a robust wave of activity. This surge in the built environment sector was further amplified by the highly awaited Big 5 Construct Nigeria held in month of September 2023, at the prestigious Landmark Centre in Lagos.

The leading international event served as a pivotal platform for us to make inroads in the rich and resourceful African construction and its allied sectors. In a joint effort with our local partner – HALLMARK GLOBAL PETROLIUM LIMITED, a highly recognized brand in the Nigerian construction industry, we put our best foot forward by showcasing our world-class scaffolding and formwork systems and components.

We have also jointly assured the local market of having handy stocks of our scaffolding and formwork systems for sale and rental to better cater the needs of the industry.

KHK FIRE SAFETY PROGRAM

Fire safety education and training is not only required by law, it's also an extremely important skill to obtain regarding the safety of employees and others in and around the work place or the society one lives in.

As an ISO:14001 and ISO:45001 certified company, KHK management organized a week-long training program on FIRE SAFETY that was attended by each and every member of KHK scaffolding & Formwork Ltd. LLC.

The program, conducted by A J Consultancy, was aimed to provide employees with skills ranging from recognizing hazards, being able to complete a fire risk assessment, taking action in preventing fires, and lastly understanding how to respond in the case of an emergency.
